

Town of Ellsworth

Public and Conservation Lands

March 22, 2002

Note: The data presented on this map are "planning quality" and should not be used as a statutory representation of the resource.

Public and Conservation Lands

Conservation lands in Maine are either privately owned, or may be publicly owned. Conservation of the natural features on the parcel may or may not be an objective depending upon the managing authority.

State 1,256 Acres

Lands include Wildlife Management Areas and other properties managed by the Department of Inland Fisheries and Wildlife, state parks, and parcels managed by the Bureau of Parks and Lands. These properties are also guided by management plans; most plans are created with a comprehensive public comment process.

Federal 110 Acres

Lands held and managed by federal agencies and include national parks, national forests, and national wildlife refuges. The majority of these properties have management plans that are based on a comprehensive public comment process and cooperative efforts between local users and stakeholders. Maine federal lands are managed from local and regional offices.

Total: 1,366 Acres

The Town of Ellsworth is approximately 59,487 Acres in Size.

Data Sources

Public and Conservation Lands Data: The Nature Conservancy of Maine, mixed scales

Town Boundaries: Maine OGIS, 1/24k Library

Roads: 2001 Public Roads Coverage, Maine D.O.T, 1:24k

Public and Conservation Lands Note

There is currently no state-level database of conservation data or means to maintain these data. Available conservation lands data will be provided as part of this project. Inventory and updates of these parcels must occur at the local level. Public access is not necessarily permitted on these lands. Please contact landowner for permission to access these parcels.

Beginning With Habitat

An Approach to Conserving Open Space

Beginning With Habitat is a cooperative effort of agencies and organizations working together to secure Maine's outdoor legacy.

Those agencies include the Maine Department of Inland Fisheries and Wildlife, Maine Natural Areas Program, Maine Audubon Society, Maine State Planning Office, United States Fish and Wildlife Service, Maine Cooperative Fish and Wildlife Research Unit, Southern Maine Regional Planning Commission, and Wells National Estuarine Research Reserve.
